Overview

The Business Analysis Use Case Specification Template is intended to provide business analysts working on RPA initiatives with the structure and guidance to define detailed requirements, specifications, and models necessary to complete Requirements. A Use Case Specification describes the system interaction between an actor/robot and the solution in the process of achieving a goal

Use Case Specification Sections

- Use Case Specification Summary (Mandatory)
- Basic Flow (Mandatory)
- Alternate Flow(s)
- Business Rule(s) (Mandatory)
- Business Data Catalogue (Mandatory)
- Notification(s)
- User Interface(s) (Mandatory)
- Report Table(s)
- Additional Details

Using the Use Case Specification Template

The Use Case Specification provides the highest amount of granularity and detail for each process to be automated in future state. When using the Use Case Specification:

- Create a single Use Case Specification for each Process Activity
- Save each Use Case Specification following the Best Practice Standards defined
- Embed each Use Case Specification as a file within the Requirements Template

Use Case Specification Summary

The Use Case Specification provides the highest amount of granularity and detail for each process to be automated in future state. The summary section defines the focus of this use case specification, actors, conditions, and trace to L3 process.

| | |
|---|--|
| Use Case Name | Manage Content |
| Use Case Unique Identifier | UC01 |
| L3 Process Map Trace | |
| Use Case Description | This use case describes a process where instructors can create, update, modify, and delete educational content on the Learning Management System. |
| Actors | |
| Primary: | Instructor (User) |
| Secondary: | Schedule (Calendar) |
| Conditions | |
| Pre-Conditions: | Post-Conditions: |
| The user is logged in to LMS with a verified GBC email address. The user has instructor access as provided by the admin. | Success Guarantee: Content is successfully uploaded/ saved / deleted, and notifications are sent to selected recipients. Minimum guarantee: System handles error and confirms exit before unsaved changes are lost. |

Basic Flow

The set of steps performed by the actor and the solution during the execution of the use case. The basic flow represents the shortest or simplest successful path that accomplishes the goal of the actor/robot

| | Step | Alternative Flow | UI/Notification |
|---|---|--|-----------------|
| 1 | This use case starts when the user adds new content | AF05 Modify existing content. AF06 Delete content | UI03 |
| 2 | The system prompts a dashboard/ interface for managing content. DE01 – User id (M) | | |

| | | | |
|---|--|---|--|
| | DE02 – name (M) DE03 – Title (M) DE04 – Information (O) DE05 – Make available to student (O) DE06 – Display After Date (O) DE07 – Display Until Date (O) DE08 – Feedback (O) DE09 – Comment (O) DE10 - Admin (O) | | |
| 3 | User clicks on the add new content option | | |
| 4 | System prompts the instructor to provide details for the new content they want to add. | | |
| 5 | User fills in the required fields and creates the new content. | AF01: Import content from available options AF03 - Syntax/grammatical error AF04 Availability of content to users | |
| 6 | System validates the input and uploads the content | | |
| 7 | Use case ends | | |

Alternate Flow(s)

Alternative flows describe any other paths that may be followed to allow the actor to successfully achieve the goal of the use case. Exception flows describe the desired response by the solution when the goal is unachievable, and the use case cannot be successfully completed. Replicate this table for each Alternate/Exception flow derived from the Basic Flow.

| AF Name & ID | | (AF01 – Import content from available options) | |
|--------------|--|--|-----------------|
| | Step | Alternative Flow | UI/Notification |
| 1 | This flow starts at step no 5 when the user selects to upload content. | | |
| 2 | System provides an option to import content from various available option. | | UI06 |
| 3 | User selects the import option. | | |
| 4 | System prompts the user to specify the source from which the content will be imported. (e.g. file upload, external link) | | |
| 5 | User select the option to add file from the device. | AF02 User chooses to import file from external link. | |
| 6 | System prompts the user to browse and select the file from the device. | | |
| 7 | User selects the file. | | |
| 8 | This flow resumes to step no 6 of basic flow. | | |

| AF Name & ID | | AF02 Adding content from external source. | |
|--------------|---|---|-----------------|
| | Step | Alternative Flow | UI/Notification |
| 1 | This flow starts at AF01 step no 5 when user selects to import from external link | | UI06 |
| 2 | System prompts the user to enter the URL of the external content. | | |
| 3 | User enters the URL. | | |
| 4 | System accesses the external content and imports the necessary content | | |
| 5 | This flow resumes to step no 6 of basic flow. | | |

| AF Name & ID | | AF03 Syntax/grammatical error | |
|--------------|---|-------------------------------|-----------------|
| | Step | Alternative Flow | UI/Notification |
| 1 | This flow starts at step 5 of Basic Flow when the System detects syntax/grammatical error in the uploaded content | | UI03 |
| 2 | System prompts for the errors in highlighted format and provides auto-correct option | | |
| 3 | User selects auto-correct option | | |
| 4 | System successfully corrects the content | | |
| 5 | This flow resumes at step 6 of the basic flow | | |

| AF Name & ID | | AF04 Availability of content to users | |
|--------------|--|---------------------------------------|-----------------|
| | Step | Alternative Flow | UI/Notification |
| 1 | This flow starts at step 5 of the Basic Flow when the user wants to make the content available at a future date. | | UI08 |
| 2 | User selects the Make Available to Students option | | |
| 3 | User fills in the Display After date and Display Until date | | |
| 4 | This flow resumes at step 6 of the basic flow | | |

| AF Name & ID | | AF05 Modifying existing content. | |
|--------------|--|----------------------------------|-----------------|
| | Step | Alternative Flow | UI/Notification |
| 1 | This flow starts at step 1 of the Basic Flow when the user requests to modify existing content | | UI04 |
| 2 | User clicks the edit content (quiz, assignment, lecture) | | |
| 3 | User edits the desired content | | |
| 4 | User has the option to auto-correct and check grammatical errors before saving the content | | |

| AF Name & ID | | AF05 Modifying existing content. | |
|--------------|---|----------------------------------|-----------------|
| | Step | Alternative Flow | UI/Notification |
| 5 | System updates the new content | | |
| 6 | User requests to modify content | AF07 – View and Exit | |
| 7 | This flow resumes at step 6 of the basic flow | | |

| AF Name & ID | | AF06 Deleting the content. | |
|--------------|---|----------------------------|-----------------|
| | Step | Alternative Flow | UI/Notification |
| 1 | User wants to delete the existing content. | | UI05 |
| 2 | System prompts the user to confirm the deletion of content | | |
| 3 | User confirms deletion | | |
| 4 | The system determines the status of the content and stores the deleted content in the trash memory for 29 days for retrieval. | | |
| 5 | This flow resumes at step 7 of the basic flow | | |

| AF Name & ID | | AF07 View and Exit | |
|--------------|---|--------------------|-----------------|
| | Step | Alternative Flow | UI/Notification |
| 1 | This flow starts at step 6 of AF04 Modifying existing content. when the user requests to view and exit | | |
| 2 | This flow resumes at step 7 of the basic flow | | |

| AF Name & ID | | AF08 System Error | |
|--------------|---|-------------------|-----------------|
| | Step | Alternative Flow | UI/Notification |
| 1 | This flow starts at any step when system error occurs | | UI07 |
| 2 | System informs user that error occurs | | |
| 3 | Use case ends | | |

Business Rule(s)

Business Rules define the criteria for behavior, decision making, and logic to be realized in the solution.

| BR ID | Rule Name | Rule Type | Description | Step (In Use Case) |
|-------|----------------------------|------------|--|-----------------------|
| BR001 | Determine User Permissions | Validation | Checks if the user's role allows specific actions such as creating, updating/deleting, or viewing content. | Pre - condition |
| 2 | Determine Approver | Validation | Determines the approver based on the Admin Number associated with the user ID. | DE01 - User ID |
| 3 | Access Control | Validation | Ensures users can only access content they have permission to view based on their roles. | Pre-condition |

Business Data Catalogue

The Business Data Catalogue refers to business knowledge used in the process of achieving the Use Case goal.

| BD ID | Business Term | Business Term Definition | Existing/ New | Business/ Formatting Rules | Business Term Example | Step(s) (In Use Case) |
|-------|---------------------------|--|------------------|---|-------------------------------|--------------------------|
| DE01 | User ID | This is a unique identifier for user | | Numeric | 10123456 | |
| DE02 | Name | Unique identifier for content | | Text, Maximum length one hundred characters | Introduction to Chapter 1 | |
| DE03 | Title | Heading and subheadings of learning material | | Text, Maximum length one hundred characters | Elicitation and Collaboration | |
| DE04 | Information | Brief description | | Text, maximum length one to thousand characters | Contents covered in chapter 1 | |
| DE05 | Make available to student | Yes/no field to select | | Yes/no | N/A | |

| BD ID | Business Term | Business Term Definition | Existing/ New | Business/ Formatting Rules | Business Term Example | Step(s) (In Use Case) |
|-------|--------------------|---|------------------|--|--------------------------------|--------------------------|
| DE06 | Display After Date | Date when the content will be available to users | | date | 01/10/2024 | |
| DE07 | Display Until Date | Date until which the content will be available to users | | date | 01/12/2024 | |
| DE08 | Feedback | Specify any feedback for the user | | Text | The correct answer is option 1 | |
| DE09 | Comment | Comments to user | | Text | N/A | |
| DE10 | Admin | Unique identifier for the admin/ course coordinator | | Must correspond to the existing user name and user id. | Tyler | |

User Interface(s)

User Interface Specifications describes the content presentation (screens, forms, navigation) the solution uses in the process of achieving the Use Case goal

Summary of User Interfaces

| UI ID | UI Name | UI Description | Step(s) (In Use Case) |
|-------|-----------------------------------|--|--------------------------|
| UI01 | Login Screen | This is where instructors log in using their GBC email and password to access the system. | |
| UI02 | Dashboard for Content Management | A central hub where instructors can add, edit, and delete content. It also shows notifications and settings. | |
| UI03 | Add New Content | Instructors fill in details like title, description, and availability dates, and upload content here. | BF01 |
| UI04 | Edit Existing Content | Instructors can modify content like quizzes or lectures. They can also check for errors before saving changes. | AF05 |
| UI05 | Confirmation for Deleting Content | Asks instructors to confirm before permanently deleting content, ensuring it's intentional. | AF06 |

| UI ID | UI Name | UI Description | Step(s) (In Use Case) |
|-------|--|---|--------------------------|
| | | | |
| UI06 | Import Content Options | Let instructors import content from files or external links into the system | AF01 & AF02 |
| UI07 | Error Message for Incorrect entry | Alert instructors if there are errors in uploaded content | AF08 |
| UI08 | Availability of content at a future date | Users can select the date on which they want the content to be available for the user | AF04 |

User Interface Specification – Screen or Mock-Up

Create a separate table for each Screen or Mock-Up within the Use Case. A screen refers to an existing interface, where as a mock-up is a representation of a new interface.

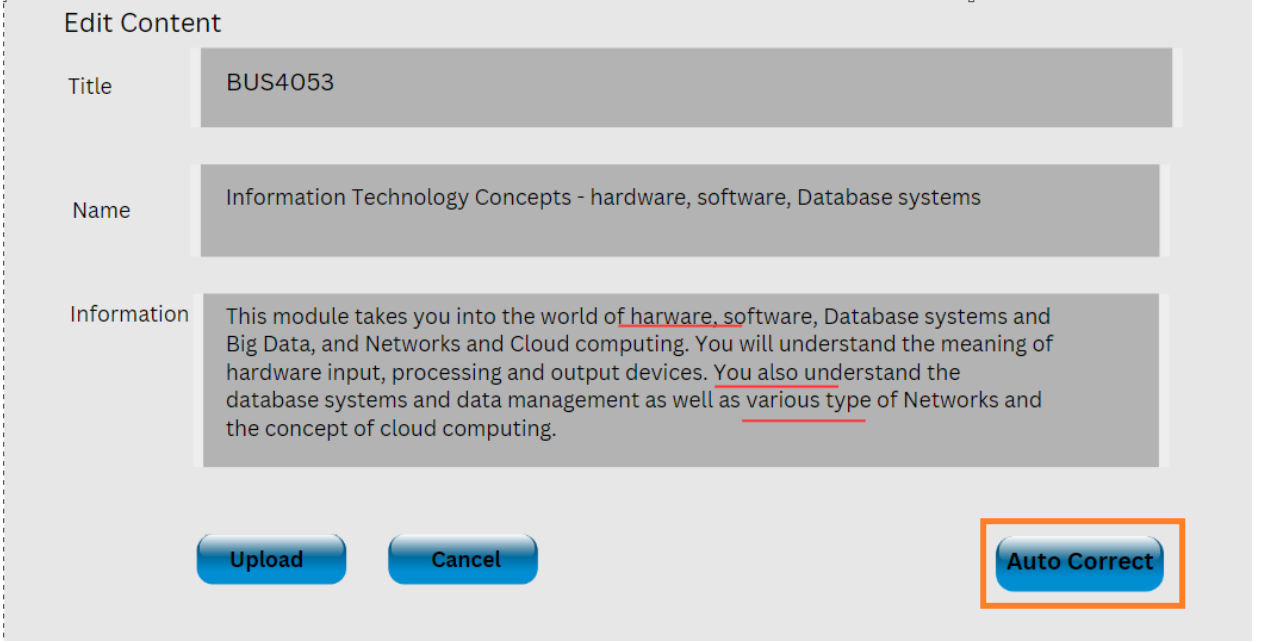

| UI ID | UI03 | UI/ Screen Name: | Add New Content |
|----------------|------|---|-----------------|
| UI Description | | Instructors fill in details like title, description, and availability dates, and can auto-correct the content before upload content here. | |
| UI Screen | | | |

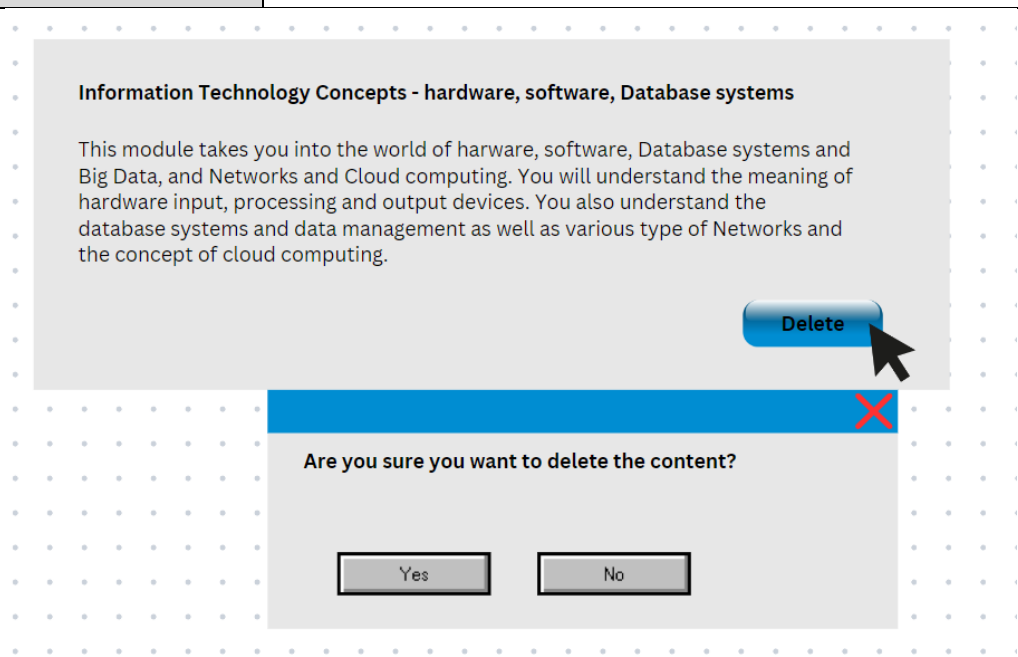

| <div> <input checked="" type="checkbox"/> Set Timer Set expected completion time. Selecting this option also records completion time for this test. Students will see the timer option before they begin the test. </div> <div> <input type="text" value="60"/> Minutes </div> <div> Auto-Submit <input type="radio"/> OFF <input checked="" type="radio"/> ON </div> <div> OFF: The user is given the option to continue after time expires. ON: Test will save and submit automatically when time expires. </div> <div> <input type="checkbox"/> Display After <input type="text" value="02/22/2024"/> <input type="text" value="04:09 PM"/> Enter dates as mm/dd/yyyy. Time may be entered in any increment. </div> <div> <input type="checkbox"/> Display Until <input type="text" value="02/22/2024"/> <input type="text" value="04:10 PM"/> Enter dates as mm/dd/yyyy. Time may be entered in any increment. </div> | | | | | |
|---|---------------------------|-----------------|-------------|--------------------------|----------------------------|
| Component ID | Component Name | Data Element ID | Type | Displayed/ Enabled Rules | Label |
| 1 | Add new content | - | Form | Y | |
| 2 | Name | DE02 | Input Field | Y | Name |
| 3 | Title Input Field | DE03 | Input Field | Y | Title |
| 4 | Description Input Field | DE04 | Input Field | Y | Information |
| 5 | Upload button | | Button | Y | Upload |
| 6 | Draft button | | Button | Y | Draft |
| 7 | Auto Correct Button | | Button | Y | Autocorrect |
| 8 | Make Available Checkbox | DE05 | Checkbox | Y | Make Available for Student |
| 9 | Display After Date Picker | DE06 | Date Picker | Y | Display After |
| 10 | Display Until Date Picker | DE07 | Date Picker | Y | Display Until |

| | | | |
|----------------|------|---|--|
| UI ID | UI08 | UI/ Screen Name: | Availability of content at a future date |
| UI Description | | Users can select the date on which they want the content to be available for the user | |
| UI Screen | | | |

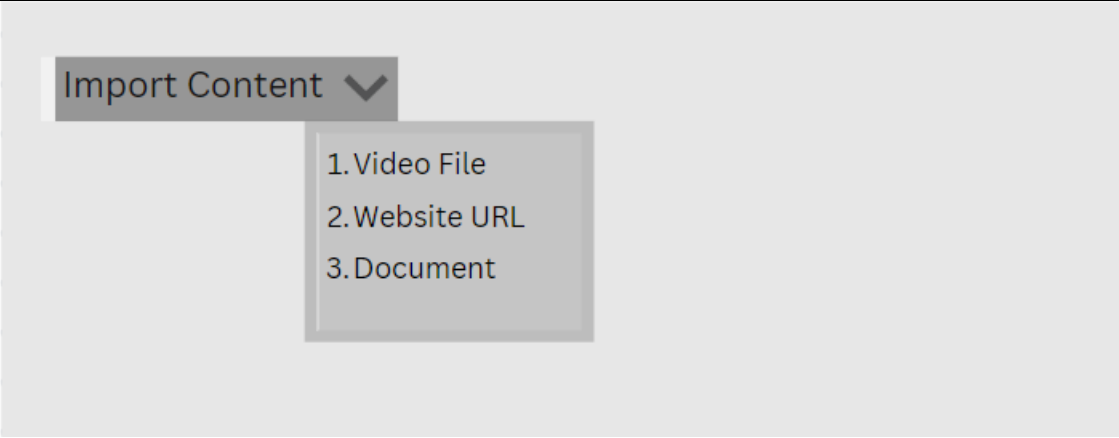

| | <div> TEST AVAILABILITY </div> <div> Make available to students <input type="radio"/> Yes <input checked="" type="radio"/> No </div> <div> Add a new announcement for this test <input type="radio"/> Yes <input checked="" type="radio"/> No </div> <div> <input checked="" type="checkbox"/> Set Timer Set expected completion time. Selecting this option also records completion time for this test. Students will see the timer option before they begin the test. </div> <div> <input type="text" value="60"/> Minutes Auto-Submit <input type="radio"/> OFF <input checked="" type="radio"/> ON OFF: The user is given the option to continue after time expires. ON: Test will save and submit automatically when time expires. </div> <div> <input type="checkbox"/> Display After <input type="text" value="02/22/2024"/> <input type="text" value="04:09 PM"/> Enter dates as mm/dd/yyyy. Time may be entered in any increment. </div> <div> <input type="checkbox"/> Display Until <input type="text" value="02/22/2024"/> <input type="text" value="04:10 PM"/> Enter dates as mm/dd/yyyy. Time may be entered in any increment. </div> | | | | |
|--------------|--|-----------------|-------------|--------------------------|----------------------------|
| Component ID | Component Name | Data Element ID | Type | Displayed/ Enabled Rules | Label |
| 1 | Add new content | - | Form | Y | |
| 2 | Make Available Checkbox | DE05 | Checkbox | Y | Make Available for Student |
| 3 | Display After Date Picker | DE06 | Date Picker | Y | Display After |
| 4 | Display Until Date Picker | DE07 | Date Picker | Y | Display Until |

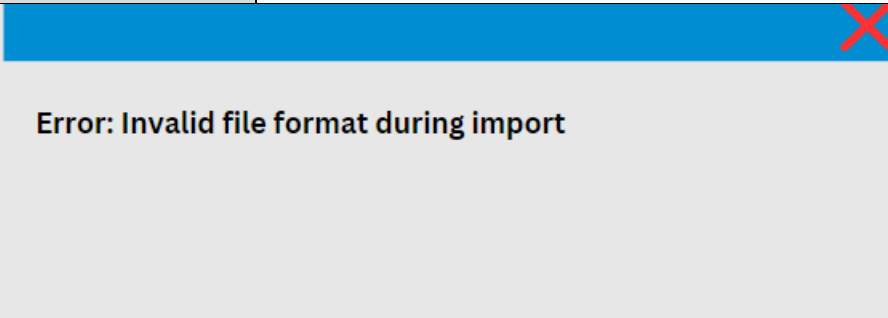

| | | | |
|----------------|------|--|-----------------------|
| UI ID | UI04 | UI/ Screen Name: | Edit Existing Content |
| UI Description | | Instructors can modify content like quizzes or lectures. They can also check for errors and auto-correct them before saving changes. | |

| UI Screen |  | | | | |
|--------------|--|-----------------|-------------|--------------------------|-------------|
| Component ID | Component Name | Data Element ID | Type | Displayed/ Enabled Rules | Label |
| 1 | Edit Existing content | - | Form | Y | |
| 2 | Name | DE02 | Input Field | Y | Name |
| 3 | Title Input Field | DE03 | Input Field | Y | Title |
| 4 | Description Input Field | DE04 | Input Field | Y | Information |
| 5 | Upload button | | Button | Y | Upload |
| 6 | Cancel button | | Button | Y | Cancel |
| 7 | AutoCorrect Button | | Button | Y | Autocorrect |

| | | | | | |
|----------------|--|---|--------|-----------------------------------|--------|
| UI ID | UI05 | UI/ Screen Name: | | Confirmation for Deleting Content | |
| UI Description | | Asks instructors to confirm before permanently deleting content, ensuring it's intentional. | | | |
| UI Screen |  | | | | |
| Component ID | Component Name | Data Element ID | Type | Displayed/ Enabled Rules | Label |
| 1 | Delete button | | button | | Delete |
| 2 | Yes button | | button | | |
| 3 | No button | | button | | |

| | | | |
|-----------------------|------|---|-----------------------|
| UI ID | UI06 | UI/ Screen Name: | Import Content Option |
| UI Description | | Let instructors import content from files or external links into the system | |

| UI Screen |  | | | | |
|------------------|--|-----------------|---------------|--------------------------|----------------|
| Component ID | Component Name | Data Element ID | Type | Displayed/ Enabled Rules | Label |
| 1 | Import button | | button | | Import |
| 2 | Import Content Options | - | Screen/Dialog | Y | Import Content |
| 3 | File Upload Field | | Input Field | Y | Upload file |
| 4 | External Link URL Field | | Input Field | Y | Website URL |
| 5 | External document | | Input Field | Y | Document |

| | | | |
|----------------|--|---|-----------------------------------|
| UI ID | UI07 | UI/ Screen Name: | Error Message for Incorrect entry |
| UI Description | | Alert instructors if there are errors in uploaded content | |
| UI Screen |  | | |

| Component ID | Component Name | Data Element ID | Type | Displayed/ Enabled Rules | Label |
|--------------|----------------|-----------------|---------|--------------------------|-------|
| 1 | Error Message | | Message | Y | |

Notifications

Summarize the Information presented to a user that summarizes an event, issue, decision, or error.

| Not.ID | Notification Name | Notification Trigger | Notification Details | Notification Example | Step(s) (In Use Case) |
|--------|---------------------------|-----------------------------|---|--|--------------------------|
| Not01 | Login Failure | Unsuccessful login attempts | Alerting the user that the login attempt failed | "Invalid email or password." | UI01 |
| Not02 | Content Added | New content added | Notifying the user that a new content item was added | "New lecture 'Introduction to Biology' added." | UI03 |
| Not03 | Content Updated | Content modification | Informing the user that existing content was updated | "Quiz 'Chemistry Basics' has been updated." | UI04 |
| Not04 | Content Deleted | Content deletion | Confirming that a content item has been deleted | "Quiz 'Physics 101' has been deleted." | UI05 |
| Not05 | Content Import Successful | Successful content import | Notifying the user that content was successfully imported | "File 'Introduction to Psychology' imported successfully." | UI06 |
| Not06 | Content Import Error | Content import failure | Alerting the user about errors during content import | "Error: Invalid file format during import." | UI06 |
| Not07 | Incorrect Content Entry | Errors in uploaded content | Alerting the user about errors in uploaded content | "Error: Title field cannot be empty." | UI07 |
